

VERY IMPORTANT
PLEASE READ

We have taken the liberty of enclosing our free Henry Repeating Arms catalog and 25th Anniversary newsletter with the hope that you may find our rifles, shotguns, and accessories of interest. Henry rifles and shotguns must be purchased from a gun shop (Henry Dealer). Please take note of the following very important helpful information:

VISIT THE DEALER- We suggest that you visit your local Henry dealer for discount pricing from our suggested retail price as opposed to calling them because many dealers are unable to answer their phones at this time due extremely high demand for firearms and ammunition.

PRICING / DISCOUNT FROM SUGGESTED RETAIL PRICE- There are Henrys for everyone's budget. They range in price from \$250 to \$3,500. We provide a suggested retail price at the bottom of each specifications box in our catalog as a guideline only. You should expect to receive some discount from our suggested retail price from your local Henry dealer.

AVAILABILITY- Currently, the demand for firearms and ammunition is at record high levels due to political and societal factors. While COVID-19 did impact our production, we are now building more guns than ever with tens of thousands of firearms shipping monthly. You may easily find the Henry you desire in stock at your dealer, or your dealer may have to contact several Henry wholesale distributors to find what you are looking for. We pride ourselves in wanting to make the process of buying a Henry a positive one, and we apologize in advance for the wait times you may experience.

LIFETIME GUARANTEE- If you are going to spend your hard-earned money to purchase a Henry, we are going to do whatever it takes to make certain that you are 100% satisfied - and the purchase is backed by our lifetime warranty.

CONTACT US – If you need further assistance please contact us at www.HenryUSA.com/help or call toll free 866-200-2354. Once again, thank you very much for your interest in Henry Repeating Arms.

Sincerely,

Anthony Imperato,
President & Owner
